

qwiet AI

The AI Enhanced Application Security Testing Platform

Qwiet AI combines our patented Code Property Graph based scanning method with our proprietary AI engine to find new vulnerabilities quicker and more accurately than ever before.

In one single scan, Qwiet AI provides:

- SAST
- SCA
- Container Scanning
- Secrets Detection
- Enhanced SBOM Creation

Qwiet AI is dedicated to helping organizations remove the distractions and focus on the issues that truly matter.

With just one click, users can immediately filter down to the highest priority reachable vulnerabilities.

Our Blacklight feature correlates your results with a real time threat feed to give you up to the minute risk information to help you focus on the most threatening vulnerabilities in your applications.

In real world tests, Qwiet AI scans 10x faster with 12x more accurate results than legacy application security testing platforms!

AppSec Services

Organizations are always pressed for time and resources. Qwiet AI can help you overcome the challenges standing between you and your optimal AppSec program with our wide array of services.
